Rex Beach's Romance of the Klondike

FRANK LLOYD

PRESENTS

### "Winds of Chance"

WITH

ANNA O. NELSON, VIOLA DANA BEN LYON, VICTOR McLAGLEN.

ONE of the most virile and fascinating stories ever written by Rex Beach, a mighty epic of one of America's most stirring periods—the gold rush to the Klondike. It is the story of one man who faced the Klondike alone, without friends or money, and tells how he won the hard fight for the thing he came to seek in that country and the love that he found. We endorse the Vulcan celebration of the Diamond Jubilee of Confederation, and promise support to the event.

### LOCAL ITEMS

Hotel Royal, near C.P.R. station, on main street, Vulcan Rates 50c., 75c., \$1. The phone has recently been installed at the Vulcan Auto Repair Shop and the number is 240.

Born in Vulcan, on May 14th, 1927, to Mr. and Mrs. C. B. Shimp, of Vulcan, a daughter.

The Alberta Gazette of May 14, officially records the appointment of Edward John Charters, of Vulcan, as Sheriff's Bailiff, Judicial District of Calgary.

Report has it that the block in which is located the Ramagham hardware and the Morden harness shop has been purchased by a local man, but the name of the buyer has not been given to the news man.

Rumor is that Vulcan is to have another grain elevator. It is said that a site has been secured on the C. P. R. In the event of the new one going up, we will then have seven. The name of the company that intends to build has not been divulged.

The Advocate has lately received from Everett Gardner a copy of the May Day number of the Willamette Collegian, published by the student body of Willamette University, at Salem, Oregon. The material and the illustrations make the paper a large and mighty interesting publication. Everett Gardner, who is a student at the institution, is a former Vulcan boy who gets honorable mention in its pages.

The dance last night at the opera house conducted by the Girls' Basketball Club, like all dances under these auspices, was a success beyond the usual. If better weather would have secured the attendance of more people there would have been no room for them. There were caps and balloons, and everything, and jollity was unconfined. Len Davis and his Arcadians provided music of the kind that kept the dancers going until far into the morning. The club well maintained the popularity of the dance, and as they always do, made some claim with which to finance the organization. The methods of the girls in the promotion of their club merit support, and they always get it.

### CARD OF THANKS

Mr. and Mrs. Wm. McNally make the occasion of the homecoming of their son Billy, who has been a patient in the Red Cross hospital, the opportunity of expressing their appreciation of assistance and kindnesses extended to him and to them, and to the Junior Red Cross and the hospital staff they gratefully acknowledge a service that can not be estimated.

### LOCAL ITEMS

Put in a new flag pole for Jubilee year and float a flag of your own. It will make the town look better for the big celebration.

A Swedish lass was married the day after she landed in the United States, and yet we think some of our home girls are fast workers.

Anglican services at St. Althelm's Church, Sunday, May 22nd: Sunday school 10 a.m.; matins 11 a.m., evening song 7:30 p.m.

At the Spooner No. 1 well a depth of 3,141 feet had been reached up to Wednesday at noon and 10-inch casing was being carried.

Rev. D. E. Kemp will conduct service at the Union Jack School on Sunday, May 22nd, at 3:30 p.m., weather and roads permitting. Everybody heartily welcome.

There is a special excursion train out of Calgary for Banff on Victoria Day, leaving the city at 8:30 a.m. and returning arrives at Calgary at 10:30 p.m., making connections both ways with the trains on the Lethbridge division.

Members of the Vulcan band went over to High River on Wednesday night to practice with the new band in that town, and a number will be there again on Friday night to assist in the first appearance of the band in concert.

There is an optimistic spirit reigning among all citizens with regards to crop prospects in this vicinity. Notwithstanding the cold weather the seed sown this spring is coming along splendidly. It is noticeable also that the seed is firmly rooted to the extent of two inches which will ensure to a certain extent against being blown in case of heavy winds.

The Calgary Power Company line from High River to points south as far as Stavelly is on the way to completion and it is expected that current will be supplied to citizens of Stavelly by the latter part of June. The poles are erected into the Village of Payley and a crew of men will be here shortly to remodel the wiring of the distribution system. The majority of farmers adjacent to the line are applying for connection and it is anticipated that ere winter comes the farm homes and buildings, as well as towns and villages, will be electrified with hydro power. The wire grew left High River Saturday morning and have progressed about six miles south and from now on the work will be pushed forward with greater rapidity.

The weather for the last week was very favorable. Last Sunday was the hottest day of the year and up to the following Tuesday the weather was somewhat cooler and on this morning a quiet steady rain started which lasted until the evening and provided an abundance of more moisture. It came in the nick of time when the wheat seeding was fairly completed and already the grain is responding to its effect. The indications are now clearing and warmer when it is certain that the germination and growth will be unusually fast. Oats are now going in the ground with an added acreage of wheat prompted by the excellent soil conditions prevailing. The wheat is well up in many places and it is not feared now that any further drifting of soil will occur, with the late soaking the land has received.

Nobody in Vulcan won the now famous Shrine home, and anyway, there is not any person in Vulcan who wants to live in Calgary. The winner was Mrs. Dippie, a Calgary lady, who was not even an attendant at the raffle, and in an interview since has declared that she bought the ticket from a lady friend at a tea one afternoon about three weeks ago, making the purchase never hoping or expecting to win and considered that her money would be nothing more than a donation to the charitable work carried on regularly by the Shrine. And so it was with the majority of those who buy such tickets. It is significant, in the light of recent events, to note the men who officiated at the drawing, namely, R. W. Ward, acting mayor; Fred Spooner, president of the Rotary Club; Dr. H. Freeland, president of the Gryo Club; G. H. Hut ton, acting president of the Board of Trade; Magistrate Davidson and W. Campbell, of the Shrine patrol. Arnold Wark (who is an Elk) was the official announcer.

Mr. L. A. Wright, manager of the Vulcan branch of the Bank of Commerce, with the several representatives of the branches of the bank in the territory, on Tuesday, attended the funeral at Calgary of the late David C. Towers, manager at Lomond, deceased, who was for ten years an employee of the Bank of Hamilton and later the Canadian Bank of Commerce in Alberta, died in the Holy Cross hospital Sunday morning following an illness which began three months before with an attack of influenza. Mr. Towers was about 40 years of age and unmarried. He is survived by relatives living at his birthplace Stromness, Orkney Islands, Scotland. Mr. Towers came to Canada in 1906 and joined the Bank of Hamilton at Lucknow, Ont. After serving at various points in Ontario and Manitoba he moved from Winnipeg to Alberta in 1917. In this province he was manager of branches at Brant, Enchant, and Lomond. Following the amalgamation of the banks in 1926 he was the representative of the Bank of Commerce at Lomond until the time of his illness.

### LOCAL ITEMS

The stucco is being put on the Stucky service station, giving attractiveness to this new institution.

Put it into your calculations that the Wednesday half-holidays start in Vulcan the first week in June.

Mr. J. T. McDonald, of Calgary, well known as a student of history and an orator, has consented to attend the Confederation celebration at Vulcan on July 1st and deliver an address coming on the invitation of the council of the town. This address will be a feature of the morning ceremonial.

Vulcan sent a ball team to Blackfoot on the first day of the week, and lost in a very good game with the score six to five. Gending was the pitcher for Vulcan, and his performance was splendid. These two teams open the local tournament in connection with the Elks' Fun Fracas.

Progress is the best report that can be made this week in connection with the proposed municipal hospital scheme. All procedure has been regularly followed, and any day now the provincial health department officials may be along to direct and instruct further in the proposition.

There is another Vulcan property transaction to record. The house and property owned and occupied by Mr. James Donaldson, has been sold to Mr. Roy Greeng, of the telephone staff. Mr. Donaldson and family contemplate leaving Vulcan and will go into the States, but will not start until the close of the school term.

With the seeding practically finished and a day or two of rain this week, crop conditions are ideal and prospects great. Never were things in better shape. The green of the grass and the rows of budding trees about town give the place a pleasing and refreshing appearance, and command favorable comment of the visitor. The town looks splendidly clean and neat.

Master Billy McNally, the young son of Mr. and Mrs. William McNally came home to Vulcan on Sunday. Billy has for twenty-nine months been a patient at the Junior Red Cross hospital in Calgary, and his return is evidence of the improvement in his condition, which is such that he can now with aids walk about a bit. The lad possesses that lively and hopeful spirit which is cultivated by the kind and careful treatment extended in the wonderful institution which has been named, and which receives much of its support from the school boys and girls throughout the province.

Without any blowing of bugles, the officials of Vulcan Oil Well No. 2, started on its long journey to the limestone this week. Vulcan No. 2 lies between Vulcan No. 1 natural gasoline producer and Spooner No. 1, being about a quarter of a mile west of the former well. The company has erected on the location what drillers describe as one of the best cable outfits in the field. The most modern machinery and equipment of every kind have been purchased for this new hole. Spudded in on Monday the well is now down 120 feet and the crew is busy cementing the 20 inch casing to cut off surface water.

Good Deeds Women's Institute met at the home of Mrs. Gothard on May 12th. There was a good attendance of members and visitors, and Mrs. Pratt presided. After saluting the flag and singing "O Canada," there was the regular order of business. Mrs. Forrester gave her report on the rest room problem. Mrs. Hutton read an interesting paper on the United States and boundary lines. A vocal solo was rendered by Miss Nellie Gothard. The sale of plants and shrubs realized a neat sum of money. The hostess served a dainty lunch, and the meeting adjourned. The next meeting will be held at the home of Mrs. Pierce on June 9th.

Mr. L. A. Wright, manager of the Vulcan branch of the Bank of Commerce, with the several representatives of the branches of the bank in the territory, on Tuesday, attended the funeral at Calgary of the late David C. Towers, manager at Lomond, deceased, who was for ten years an employee of the Bank of Hamilton and later the Canadian Bank of Commerce in Alberta, died in the Holy Cross hospital Sunday morning following an illness which began three months before with an attack of influenza. Mr. Towers was about 40 years of age and unmarried. He is survived by relatives living at his birthplace Stromness, Orkney Islands, Scotland. Mr. Towers came to Canada in 1906 and joined the Bank of Hamilton at Lucknow, Ont. After serving at various points in Ontario and Manitoba he moved from Winnipeg to Alberta in 1917. In this province he was manager of branches at Brant, Enchant, and Lomond. Following the amalgamation of the banks in 1926 he was the representative of the Bank of Commerce at Lomond until the time of his illness.

### LOCAL ITEMS

Mrs. C. H. Hoskyn has gone to Manitoba for a holiday and visit for a month or two.

Chautauqua is booked for June in Vulcan, commencing on the 20th. It has been proposed to hold Chautauqua this year in the municipal rink, the idea being to jointly seat and equip the same in good shape for the programs and the Confederation ceremonial on Dominion Day.

Sandpit school is one of the latest organized in the territory. It was decided to join the Vulcan and district school fair, and the other day in walked Trustee DeWitt with the cheque that pays the fee. That is dispatch, and indicates that this school will make a place in the fair.

The general improvement in the grounds at the two schools commenced on Monday with a general clean-up by the pupils. Trees were planted and the plan to join the two grounds into one fine big school park was started. There is considerable area and with the changes contemplated it will be just what is planned.

One feature of the Confederation celebration at Vulcan on Dominion Day, will be the assembly of all the pupils of the schools in the district, all that can be persuaded to participate, and the invitation will not be limited. Teachers and school officials are requested to at once become interested in this feature of the big event.

Master Jack Lebeau has sufficiently recovered to be home from the hospital, and Mrs. Robert Ferguson is another of our citizens who has been a patient at Calgary and is back home. Mrs. Alf Roebuck went into the hospital at Calgary on Thursday. While there has been no epidemic of any kind in town or district surrounding, the number of the ill has been quite remarkable.

The fire alarm sounded about nine on Tuesday morning, and immediately men and apparatus were fighting fire on what is known as Dad Reynold's triangle farm. The small house on the place had taken fire from an overheated stove during the absence of Mrs. Reynolds, who was attending to the chickens. The little house and the contents were practically destroyed, and there was no insurance. Friends in town have contributed to replace the building.

Thursday and Friday, September 29th and 30th, are the dates set by Superintendent Benn for the Vulcan and district school fair. It will be a two-day event this year, the fair having expanded to the extent of making the change necessary. It is planned to have the exhibit placed and judged on the first day in time to have the exhibition open the night of the first day and all of the next. The extra time will be used to facilitate the management of the whole affair and give all ample opportunity of seeing everything. The details will be announced later.

"Marion is doing beautiful work in all her subjects, and she has now been elected editor-in-chief of the College Magazine. We are all proud of her, and I am sure you will be exceedingly pleased with the development she has made this school year." Thus writes Principal Dabson of Alma Ladies' College to Mr. and Mrs. T.B. Lebeau, and the many friends of this talented Vulcan young lady will share with the parents the satisfaction which this message conveys, and The Advocate is particularly interested in the appointment as editor. Miss Lebeau will shortly return to Vulcan for the vacation period.

The local football team had Carshop Rangers of Calgary, as their guests on Saturday last and continued their winning streak by a four goal to nothing score. The game was fairly even in the first half with Rangers defending stubbornly and no score being made. In the second half, however, Vulcan attacked strongly and Andy Hetherington had three goals and Scotty Pearson one. All the local team played fine football. The Rangers played well but the pace of the local boys seemed too much for them in the second half with the result that they also became Vulcan victims. We have a football team second to none in the province, a purely amateur organization—no man on the team receives one cent for his services. They are putting Vulcan on the map, and it is up to everyone to boost for them and show we are backing them on every occasion. The Vulcan football team was organized three years ago, and the present aggregation is the result of perseverance and dogged determination of the players and their executive. They have never asked for financial assistance and now as they are stepping into faster company with correspondingly increased expenses, all sportsmen of the town and district can best show their appreciation by increased attendance and donations at the games.

## WHEN BANK OF MONTREAL TOKENS WERE USED FOR SMALL CHANGE

FOUNDED before Canada had any currency of its own, the Bank of Montreal in the early part of the Nineteenth Century obtained authorization from the British Government to issue copper tokens for small change.

Reproduced herewith are the two sides of the one-penny token of 1838 and of a "habitant" token of 1837. The obverse of the former shows a picture of the building used by the Bank of Montreal at that time, the obverse of the latter a typical farmer of Lower Canada, now Quebec. The reverse of both coins is the same, showing the arms of the city of Montreal.

Throughout its long history, the Bank of Montreal has always been active in serving the financial needs of the people of Canada, steadily extending its service as the need and opportunity for it arose.

## BANK OF MONTREAL

Established 1817

TOTAL ASSETS IN EXCESS OF \$780,000,000

Vulcan Branch: H. S. SUTHERLAND, Manager.

We endorse the Vulcan celebration of the Diamond Jubilee of Confederation, and promise support to the event.

## The Vulcan Advocate

An Independent Weekly Newspaper office of publication, Vulcan, Alberta. Subscription price per year, in Canada \$2.00, United States and other countries \$2.50. Advertising rates furnished on request.

### VULCAN ADVOCATE

#### TEMPERANCE

Bishop Fallon of London, speaking at a confirmation service recently, made a strong appeal to the people of his diocese to observe the new temperance law soon to come into force in the province of Ontario. His Lordship said that the old prohibition law had disgusted the people because of the fact that it had not been properly enforced. The success of any law depends upon the attitude which the people in the mass adopt towards it. No matter what law comes into force in Ontario to succeed prohibition, such a law will meet with a measure of success equal, and only equal, to the measure of respect which it will command in the majority of the people. Prohibition proved a failure because it did not, indeed could not, engender respect. Prohibition could not be enforced because as a legislation it was abhorrent to the people. The very word prohibition with its notion of compulsion and coercion is abhorrent to a free and democratic people. The artificial restraints of law which leave out of reckoning the will must ever end in failure. Every law in itself must make its appeal. It must be same, and if it has restraints it must be apparent to the subjects of the state that such restraints are to their own and the state's interest. There must be a dispassionate consideration of the evils which call for such a law. In the case of liquor legislation whatever from it takes, from press, pulpit and platform, must be taught the evils of drink. In our age of superficial thinking, especially among the young, there is not a real understanding of the perils which lie in the way of those who are developing the drink habit. How few among the smart young flock set to whom it ever occurs that whiskey is going to kill all that is finest and best in their nature, going to coarsen their affections and drag them down to the level of the beasts. How few of such renege upon the moral blindness which their drinking will inevitably bring. Our hope for success of liquor legislation hinges on a proper realization by the young of this country of drink's possibilities of evil and of our whole people's recognition that we, each one, are our brother's keeper.—Western Catholic.

#### FREE PUBLICITY

There are some queer kinks in the human mind. One of these, which daily comes under the observation of newspapermen, has to do with the continued existence of the organizations they control. It is the unending stream of requests for free publicity. These present one of the most irritating problems in every newspaper office, from the rising of the sun on the Guardian, published in Charlotte, Prince Edward Island, until the glow has died out in the evening over the Pacific ocean. Blessed is the day, and rare indeed, when in each and every newspaper office, weekly or daily, there are not several requests for support, for this struggling organization or that million dollar enterprise, etc., etc. It is not a rash statement, but one that is only too true, that each week, and often each day, enough requests for free boosts are received to occupy at least half the space the harassed editor has allotted to him in the forthcoming issue. If any editor were to comply with all the requests made upon him for the space desired, no paper would be compelled to suspend publication within the year. It would be throttled, because there would not be money enough in the cash drawer, or the editor's pocket, to pay the printer's devil his weekly wage, even if all others gave their services as freely as the editor gave space in his paper.—The Vernon News.

#### TENNIS

Our attention has been called to an editorial in a recent issue of the Edmonton Journal regarding tennis as a game for boys. In part it states: "A generation ago it was regarded with something like contempt as a game only fitted as a mild accompaniment to afternoon tea parties, at which the local curate disported himself decorously with the younger members of his church workers. The modern tennis players, Tilden, Johnson, Lacoste, and the dramatic, temperamental, brilliantly efficient Mlle. Legien have quite changed the character of the game and the public attitude towards it. It is now recognized as one of the fastest games played, calling for not only skill but endurance on a high scale if outstanding success is to be attained."

It also states that while the game calls for unbounded energy, a sound wind, good eye, judgment and control, the element of risk beyond an occasional black eye or bleeding nose is lacking, and gives the reason of an old sportsman in opposing the game for boys as follows:

"Football, baseball, and cricket, all involve certain varying risks of physical injury, the facing of which has a moral value in it, which is of real service. The boys who can stand up to such risks, and take the hard knocks without flinching and without showing signs of temper are gaining something of self-control and courage, which they cannot get at tennis and games like it."

And while we will not disagree with the old sportsman in upholding the games in which the player takes a chance, yet there are other things which must be considered, and aside from the lack of risk, tennis seems to be all that can be desired. Tennis calls into action more muscles than any of the other games mentioned, and is a faster game in every respect. There is no limit to the speed and it can be enjoyed by the novice or the veteran. Fast tennis makes probably as large demands on one's physical endurance as does football in its different forms, and larger than baseball and cricket. As there is no limit to the speed, there is also no limit to the science and skill which can be acquired. It can be enjoyed as a game for many years, but one cannot become a skillful player unless they start very young.

In view of the many things which can be said in favor of tennis, it would appear to be a suitable game for all—boys, girls, men and women.

#### DID YOU EVER STOP TO THINK

R. W. Angus, vice president and editor of the Chatham, Ontario, Daily News, says:

"That your home merchant is a partner with you in building up the social and business life of your community. It is worth a thought, for it places buying in a new light."

If you owned a grocery store would you send out of town for the food that appears on your table? You may not own a grocery business, but you are part owner of a city, which represents a business that has to be kept going. Your partners in that ownership are your grocer, your hardware man, your dry goods man—every merchant and citizen of the community.

You derive dividends from that business—such as educational facilities, fire protection, police protection, well kept paved streets to ride upon—all of the advantages that a modern city supplies.

The capital you invest is represented by the taxes you pay. If the business is not run upon a sound financial basis, you increase your capital investment by paying more taxes. The best way to keep taxes down, is to promote local prosperity through co-operation with your partners in that civic business. If you buy out of town, the local merchant has greater difficulty in making his private business pay, and he has more trouble in meeting his taxes. When he fails to pay, the other partners in the civic business have to make up the deficit. You pay more taxes.

So, through buying at home, you are helping to reduce your own taxes.

#### FOR THE FULLER LIFE

Interest in physical education is growing. Everywhere physical culture colleges and so-called life extension institutes are springing up. All will agree that this attention to hygiene and physical training is an excellent thing. But it seems odd that so many should lay stress on physical culture merely as a means of prolonging life. The value of physical education in extending life is, after all, only incidental. Its real merit is in making life worth living. A general extension of the period of life is of interest mainly to the actuary. More appealing to the average man or woman is the new zest in life that comes from physical training and health culture. It is less the desire to live longer than to live more fully that is increasing the ranks of the physical culturists. A hearty appetite, a perfect digestion, a 100 per cent efficient liver, a clear brain and a general physical exhilaration—given these as the reward of physical culture, no one worries much about the problem of life extension.

Commenting upon the change of the old signs, "Keep off the grass," for others reading, "Citizens, take care of your own property," an exchange remarks that, "when it gets into the system of a citizen that the parks belong to him in common with all other citizens, his patriotic pride is awakened, his personal interest is accelerated, and he no longer growls about the part of his tax which goes to the proper care of parks."

"The habit of criticism grows upon us because criticism is the easiest thing in the world. It does not take a thimbleful of brains to find fault and the biggest num-skull in the world can find fault with the greatest man in the world. We flatter ourselves that criticism is a sign of superior intelligence. It is not. It is usually a sign of bad manners, lack of self-restraint, and of entire ignorance of psychology."—Winchester Press.

Electrical utility surpluses are a fine thing, but when they are achieved at the expense of the users of the utilities through the imposition of high rates, it is not to be wondered at that the users question the value of the surpluses.—Lethbridge Herald.

Did you ever notice that the man who is always ready to "let George do it" is also seen to be the first to find fault with the way George does it?

On their arrival in Canada last week, two Poles were married. That's what might be called a wooden wedding.

Let us be glad that Canadian banks are safer than those of the Mississippi.—Toronto Telegram.

## BEDDING PLANTS

Now is the time to put in your Dahlias, Shurbs, Vegetable Plants, Gooseberry, and Currant Bushes.

Cabbage, best early and late, Celery, Cauliflower, Pepper Plants, Rhubarb, Tomatoes, Cucumber Plants in pots.

FRESH PLANTS arrive every FRIDAY evening.

We carry a full line of flower and vegetable seeds.

#### MY WIFE

A disciple of auto-suggestion  
My wife is, without any question, Whenever we ride, she sits by my side And directs me through traffic congestion. She says, "To the left! Use your brake, dear!" "Go slow! Have a care! You stalled it—now there!" I knew you would make a mistake, dear!" She tells me of motors behind me, And headlights approaching that blind me. I say, "Oh, shut up! Who's driving this Hup?" But I never have known her to mind me. Day by day she gets steadily worse, With her comments so needless and terse, Till I fully expect when she's dead she'll direct The man at the wheel of the hearse! —The Wampus

#### FORESTS PREVENT FLOODS

Various are the causes blamed for the Mississippi flood. One is the destruction of the forests. A writer to an American paper declares that the flood is teaching a terrible lesson to the inhabitants of the inundated areas. He goes to show that from the streams of the national forests over 700 western cities and towns, having an aggregate population of nearly 2,500,000, obtain their water supply. The forests include 1266 irrigated projects and 325 water power plants, as well as many other power and irrigation enterprises which depend on the government timberlands for water conservation, and the regulation of rainwater run-off and stream flow. Forests are said to be necessary at the head of streams for interrupting the force of the raindrops and absorbing the fall on the forest floor. The forests act as sponges. When the land is clear the heavy rains flow off in impetuous streams without hindrance or diversion. The gathering welter of raindrops soon make up a flood, which added to the level suddenly and at one time above the natural banks, with the results as seen in the Mississippi. Whether one may agree with this explanation of the floods in the Mississippi or not, the fact remains indisputable that forests do act as conservers of the nourishing rain. To regulate and distribute rain was evidently one of the original and eternal functions of trees. They are like pillared screens and reticulated sponges for the overwhelming downpours of heaven. When the trees disappear, rivers break their banks and the land is inundated.—Exchange.

In a synopsis of business for the period April 1, 1926, to March 31, 1927, the Saskatchewan liquor board announces gross sales of \$10,305,208 and net profits of \$2,114,866.

**The Best Dairy Pail Value ever offered**

We built this SMP Dairy Pail for the man who is "tired of buying new pails all the time." They are made of good heavy tin, highly polished; strong bottoms; heavy wire handles; and put together the way a pail should be. You'll get full value from every cent you invest in SMP Dairy Pails and other Dairy Tin Ware. Made by THE SHEET METAL PRODUCTS CO. LIMITED, MONTREAL, TORONTO, WINNIPEG, EDMONTON, VANCOUVER, CALGARY.

## WORTH \$2525 EACH

Every Man, Woman and Child in  
Canada is worth \$2525

Canada's national wealth is officially estimated at twenty-two billion dollars, or an average of \$2,525 per head. This is apart from undeveloped natural resources. There are no accurate figures available as to what the national wealth was at confederation, but it is estimated at under one and a half billions. It is now, therefore, around fourteen times what it was when Canada became a dominion. Agricultural values make up about eight billions of the present total; urban real estate nearly six billions; the railways considerably over two billion.

Ontario owns about one third, Quebec one-quarter and Saskatchewan about one-eighth. By provinces, Canada's estimated national wealth is distributed as follows:

Province	Wealth	Per capita
P. E. I.	\$119,912,060	\$1,353
N. S.	\$52,697,986	\$1,317
N. B.	\$57,596,369	\$1,317
Quebec	\$5,511,819,967	\$2,347
Ontario	\$7,353,397,816	\$2,567
Manitoba	\$1,650,495,868	\$2,705
Saskatchewan	\$2,845,642,985	\$3,757
Alberta	\$1,950,973,479	\$3,317
B. C.	\$1,365,896,120	\$2,604
Yukon	\$16,869,792	\$4,058
Totals	\$22,195,302,443	\$2,525

Estimate is based on returns taken in the last census.

### FROM NANTON NEWS

Born, to Mr. and Mrs. Chas. Phillips, on Sunday, April 22nd, at the High River hospital, a boy. He will be named Keith McCaw.

Voss Brothers, elevator contractors, commenced work on the Wheat Pool elevator at Durward on Monday. Durward is the C.P.R. siding four and a half miles south-east of Nanton.

Alex. Whiteside was taken to the High River hospital following injuries received in a runaway, while driving his land. As he threw himself clear of the disc, his injuries were not as serious as they might have been, and he expects to be home again in a few days.

The new steel bridge across Mosquito creek north of the railway station will be completed early in the week. Work is progressing somewhat slower during the last few days owing to the loss of a part of the riveter, and the delay caused by the completion of this work by hand will amount to about two days. The bridge is a hundred foot span with a width of eight-een feet.

The 5th Mounted Brigade, composed of the 19th Alberta Dragoons of Edmonton and one squadron from Chauvin; the 15th Canadian Light Horse of Calgary, Crossfield and Okotoks; the 2nd Alberta Mounted Rifles of Pincher Creek, Claresholm, Nanton and High River, will train at Sarcee Camp this summer, for nine days, from July 2nd to 10th inclusive. A larger number of men will be allowed to train this year than was the case last, and the strength of "C" Squadron of Nanton and High River will be 42 of all ranks instead of 22 as was the case last year. Other arms, including artillery will be in training at the same time.—Nanton News.

Angus MacDonald and his girl were rambling around town one evening when they came to a movie theatre. He ran his eyes over the front of the building. It rested on a title in large letters, "The Woman Pays." "Seida," he said, "I think we'll gang in here."

## A NEW INDUSTRY

Calgary Will Have a Biscuit Factory  
Started in the Neilson Warehouse

Negotiations were recently completed by the Neilson Furniture Co., Ltd. for the sale of their warehouse property on the corner of 11th avenue and 4th street east, to Mr. H. Shaw of Edmonton. The property concerned is a three-storey red solid brick building, facing 66 feet on Eleventh avenue and 110 feet on Fourth street east, with an apron spur track at the back. It was erected by the Neilson Furniture Co. in 1912, and has been used as their furniture warehouse since. The Independent Biscuit Co., Ltd. will establish a new industry in Calgary which will give employment to over 100 persons. Neilson's have to vacate by May 31, and a removal sale is being held, announcement of which is on another page of Times. Arrangements are being made to take care of the surplus stock of the firm in temporary quarters. It is the intention to build a new warehouse more suited to the needs of the company. The biscuit factory will be remodelled and another storey added and will be in operation about September 1st.

## W. D. LINEHAM DEAD

Was Well Known Pioneer, with 39  
Years Residence in Alberta

William Donald Lineham, one of the best known old-timers of Alberta, died at his home in Okotoks, on Sunday morning, following an illness of seven months' duration. He was 64 years of age and was born at Elms, Perth County, Ontario. He had resided in the Calgary and Okotoks districts for the past 39 years and was highly respected by all with whom he came in contact. For many years he was associated with brother, the late John Lineham, M.L.A., in the lumber business at Okotoks. They established a mill there in the early days and floated the logs down Fish creek from the mountains. This industry flourished well for many years, but he later went into the cattle business. The deceased brother, the late John Lineham, was one of the pioneers in the development of the oil industry in Alberta, having drilled one of the first oil wells of the province, southwest of Pincher Creek, 20 years ago.

The deceased was the father of a large family, who remained at home and assisted him in his enterprises contributing materially and industrially to the development of the province. He is survived by his widow and five sons, Thomas E., John M., William M., George A. and Donald, all residing at Okotoks; also two daughters, Minnie Lineham, of Santa Monica, Calif., and Margaret, residing at home.

The late Mr. Lineham is also survived by two brothers and one sister, Dr. Donald Lineham of Vancouver, B. C.; Angus Lineham, of Dawson Creek, B.C., and Mrs. David Morrison, of High River. He was a member of the Southern Pioneers' and Old Timers' Association, and he was known as an enthusiastic curler and hunter. Many friends from Calgary, High River and Okotoks districts attended the funeral which took place from the United Church, Okotoks, on Tuesday afternoon. Interment was made in the Okotoks cemetery.

### ITEMS OF INTEREST

An Alberta farmer has two cows that gave him a net return of \$740 within a year.

A Claresholm farm was sold recently for \$62.50 per acre. Land is steadily going up.

Some time in June the members of the Alberta Legislature will have an excursion to the Peace River country on one of the E. D. and B.C. railways. They will also see a portion of the country by motor car.

The Taschereau Government of Quebec, was sustained at the polls on May 16 in the provincial elections by very large majority. The Liberals will have 72 members, Conservatives 9, Independents 3.

Andrew Kehoe, a Michigan farmer, placed 500 pounds of dynamite near a large school, touched off the charge by firing a high powered rifle, into a box of explosives and the school was wrecked, killing about 50 of the school children. The culprit who was killed is thought to have been insane.

Work on the hydro-electric line between Nanton and High River is progressing favorably, and there is no doubt that the line will be in operation before June 1st. The post note machine is working in the vicinity of Cayley, and digging a hole every twelve minutes. The crew working on the erection of poles is now several miles out of High River and it is expected that the poles will be erected by Wednesday. The crew which was working in the vicinity of Okotoks, is increasing the capacity of the line has finished with their work, and moved down to High River and the work of stringing the wire on the new line has commenced.—Nanton News.

Fifty-eight more immigrants arrived in Cardston on Thursday's train, without capital or destination ascertained. At this rate, the country will be flooded with foreigners who are utterly helpless to improve their positions, dependent entirely upon the assistance of residents already established. The burden of this policy falls particularly upon the laborer for farmers finding someone willing to work for \$10 to \$15 a month, naturally will take these men on, letting out the for mer employees. As it is, with the country flooded with cheap labor, and unskilled labor at that, hundreds of people in this district must find employment elsewhere. Who is responsible for this condition of affairs? An immediate investigation into the immigration methods is imperative.—Cardston News.

## ALBERTA IS INTERESTED

In connection with the Brooks Steam Motors now prominently before the Canadian investment world, it is interesting to know that stock amounting to a quarter of a million dollars was sold in this territory, a large bulk of it to farmers. Quite an intensive campaign of stock selling was launched after the demonstration car passed through to the coast. Stockholders in the south are watching closely the trend of the company's affairs in the east. The company's factory is located at Stratford.—Lethbridge Herald.

### SPECIAL TRAIN TO BANFF

The District Passenger Agent, C.P.R., at Calgary, has notified agents from Lethbridge to Aldersyde, Macleod to Calgary, Edmonton to Calgary Medicine Hat to Calgary, that a special train will be operated from Calgary to Banff and return on Victoria Day, May 24th, as follows: Leave Calgary at 8:30 a.m., arrive at Banff at 11:10. Leave Banff at 8:15 and return to Calgary 10:33 p.m. Special excursion fare of \$3.30 plus tax for adults, and \$1.65 plus tax for children, will be in effect from Calgary to Banff and return, good only on the special train.

### TAX MAIL ORDER HOUSES

A Judge in Charlottetown, P.E.I., is authority for the statement that the Federal Parliament has power to levy a tax on mail order houses based upon the business they do throughout the country. He advocates that the tax should be related to the provinces in proportion to the amount of business done in each. This would be at least a step toward some form of justice for those who are compelled to pay taxes where the mail order houses escape scot free, but it leaves untouched the vital point. The municipalities are, after all, the parties most directly concerned. Until there is some way in which municipalities can legally levy toll against the houses who encroach tax-free, upon the domain of their retail merchants, injustice will have to be tolerated.

"Stand by your own merchants and let the outside dealer hustle for himself" is the advice passed out to its readers by one of our exchanges. If the home merchants hustled as much in their own community to hold the old, and get the new business, as the outsider has to get his, there would be no need for advice of this kind.

Scotty Wright, an old timer of Cammangay, was burnt to death in a fire which destroyed his home.

In one week English speaking citizens of Montreal raised over \$1,755,000, to be handed over to the hospital of that city.

Thirty-four families, bringing capital of \$1,141,750, have come to British Columbia from Great Britain so far this year as part of a new movement of people of independent means who will settle here, according to advice received by Hon. J. D. McLean, acting premier, from F. A. Pauline, British Columbia agent-general, in London.

# A Revelation in Roadability Among Medium Priced Sixes

This invites you to try out the new Hupmobile Six—to experience the delights of highest-grade six-cylinder performance which it assures you at a very substantial saving in first cost.

To make sure that this Six is all that any six should be, Hupmobile has deliberately raised its quality ten per cent without raising its price one single cent—with the result that the Hupmobile Six very evidently offers more quality per dollar of purchase price than any other six on the market.

Come see the new Hupmobile Six today. You're bound to admire its beauty of line and color, its luxury of appointments, its unusually complete equipment.

Every Worth While Feature  
the Modern Car Should Have

Clear Vision Bodies • Color Options • Mohair Upholstery  
Instrument Panel Under Glass, Indirectly Lighted • Vision-  
Ventilating Windshield • Tiding Beam Headlights • Headlight  
Control on Steering Wheel • Both Mantfold and Thermostatic  
Heat Control • Dash Gasoline Gauge • Gasoline Filter • Force  
Feed Lubrication • Oil Filter • Special Vibration Damper  
4-Wheel Brakes • Balloon Tires • Snubbers.

Sedan, five-passenger, four-door, \$1910. Brougham, (illustrated)  
five-passenger, two-door, \$1910. Coupe, two-passenger, with  
rummy seat, \$1910. Roadster, with rumble seat, \$1910. Tour-  
ing, five-passenger, \$1825. All prices F.O.B. Windsor.

Collision

Every day one reads newspaper reports of auto accidents. In these days of good roads and high powered cars every car owner should carry insurance. Let us quote you our rates.

## Flood, Whicher & Elves

VULCAN

We endorse the Vulcan celebration of the Diamond Jubilee of Confederation, and promise support to the event.

## An Old Face In a New Place

Personally I need no introduction to the great majority of the people of Vulcan and territory, having resided in this district for more than 20 years. As well as meeting my old friends I will be pleased to make new ones and serve both new and old to the best of my ability, giving a service that I trust will be profitable to both myself and my customers.

I am handling the Nash car and will be pleased to give a demonstration at any time. It is second to none on the market. Come and see it for yourself.

I will carry a full line of repairs and accessories for all the lines which I handle.

### Just A Word About Service

I am prepared to give the very best service, having made arrangements with the Vulcan Garage & Machine Shop to do my work. Do not overlook the fact that I am in a position to give you service.

I also have a few Used Cars that are good value.

In addition to the above I am writing Insurance in all its branches. I solicit a share of your business, and assure you of courteous treatment and strict attention to business.

**DONALD SINCLAIR**

Premises Opposite Royal Municipal Office.

We endorse the Vulcan celebration of the Diamond Jubilee of Confederation, and promise support to the event.

## C. P. R. CROP REPORT

Except for heavy rains over Eastern Manitoba on thirteenth and light showers in scattered districts of the three provinces, weather since Tuesday last has been favorable for carrying on of spring operations. Substantial progress was made with seeding and amount of work accomplished is surprising in view of fact that heavy general rains of previous week had threatened a complete suspension of activities for several days. Delayed seeding will likely result in somewhat decreased wheat acreage. On the other hand moisture conditions are unusually favorable and farm help is plentiful everywhere, and with this combination it would appear reasonably certain that farmers will put in all the wheat acreage that they can safely do so. A continuance of warm dry weather for balance of May is needed all over West, and if this is assured seeding will be rapidly completed. Wet weather this spring has greatly improved outlook for a good hay crop, which is very necessary this year as in most districts there is scarcely a ton to be had. Prairie grass coming along nicely and will afford great relief to livestock. Farmers are on the land everywhere and a week or so of good weather will see wheat seeding finished except, of course in excessively wet areas. Conditions throughout province are very irregular in respect of amount of seeding done. From Edmonton extending East to Saskatchewan boundary and south as far as Red Deer, twenty-five to thirty-five per cent of wheat seeding is finished. Red Deer south to Lethbridge about sixty per cent seeded. East of Taber very little work is done yet as the land is quite wet. More moisture over whole of Alberta than in previous year of this time. Likely to be much more stubbling in than usual on account of late season and wheat acreage except in some Southern Alberta districts, will likely be somewhat reduced.

## ANOTHER INDUSTRY

High River was visited recently by Thomas B. Walsh, independent producer and Neil Hart, the well known western film star, who was formerly associated with the Universal Company. They came here with Mr. Guy Weadick and were guests of the Guy Weadick at their regular luncheon. Mr. Walsh who is a native born Australian and Mr. Hart are in Alberta at present looking over possible sites upon which to establish a studio ranch. The camera laboratories and indoor sets will be made in this province, in fact a permanent branch of the industry will be established here. Mr. Weadick in introducing them said it was the purpose of these men to produce western pictures and they would use the atmosphere of the province to the fullest advantage. This move has been brought about because of the quota law passed restricting to a degree, the showing of films in Great Britain to British made films, and according to Mr. Walsh, the market for these films will be almost entirely British, including, of course, the markets of the dominions. The local productions will be produced on an independent basis because Mr. Walsh pointed out, the exhibitors in Great Britain are purchasing independent productions as much as, if not more, than those syndicated. It is understood that Neil Hart, considered one of the most outstanding stars of western films, will play the leading roles in a number of these pictures. Westerners have been chosen because of continuous demand and box office returns they are the most reliable.

## LOST AT SEA

Hope for the rescue of the French aviators, Captain Nungesser and Coli, appears to hang by the tenuous thread that they have been picked up at sea by Newfoundland fishermen or by some small coasting vessel off Ireland.

Overdue on their airplane flight from Paris the fate of the French war aces has become a mystery of the sea. Wireless stations from New York to Labrador sputtered messages in all directions asking steamships in their course to hunt for the aviators. But none reported sighting the "White Bird" which hovered off so heavily from Le Bourget Field with the "Skull and Cross Bones" marked on the white fuselage as if to defy the elements.

The Canadian, British, French and United States governments, instituting searches for the missing men appeared balked in their early efforts to locate the plane. The White Bird has not been sighted since she was seen flying northwest of Carrag Island, Kerry and Kilrush County Clare, Ireland, at 11 o'clock Sunday morning, so that the aviators may have been forced down anywhere along the remaining 3200 miles of the water course. Under orders of the Canadian government, wireless stations, patrol boats, and lighthouse keepers all along the shores of the maritime provinces are trying to find the airmen and to render them aid. The Canadian marine department announced Tuesday afternoon that it was without advices on the French fliers from any source.

## BEATS WEED PEST

The problem of the scientific elimination of certain weed pests, which has baffled researchers in America and Europe for 50 years, it is claimed has been solved by a young Canadian scientist, Leonard Huskins of Calgary, Alberta, a graduate of the University of Alberta. At the Royal Society he showed the results of two years experiments at King's College, London, and the horticultural college at Merton, to which he has recently been appointed. Professor Huskins' discovery, which is of great value to farmers, and it is expected to bring about an appreciable improvement in cereal crops, consists of tracing the reversion to the wild type of the so-called false wild oats, which are a well known pest in Canada, the United States and elsewhere.

It is estimated that this year Canadian emigration will exceed 200,000. The tide has definitely turned towards this country.

## AIRSHIPS TO THE RESCUE

With the successful transporting of 16,000 pounds of material and 12 men to Fort Churchill on Hudson Bay across 160 miles of trackless winter wilderness the value of aeroplanes in Canada's northern development has again been strikingly demonstrated. Last March Frederick Palmer, the British engineer who was secured by the government to pass upon the relative merits of Nelson and Churchill as the most suitable terminal port for the Hudson Bay railway, asked that borings be taken of Churchill harbor. He would require the information upon his arrival in July to inspect the ports. That meant that men and machinery must be sent to Churchill without delay. The straits and bay were impassable; snow-covered muskeg made the overland route seem almost as impassable. Three possible methods of land transportation were considered by the department of railways and canals—dogs, horses and tractors. The first would require about 70 dogs and many expert drivers, and would take a long time to assemble; the second would mean the sacrifice of a dozen teams of horses, as there would be no fodder for them at the port, and both were abandoned for the caterpillar, although with many savings. Two machines had already been bought when aeroplane came to the rescue. On March 21 two machines flew from Hudson on the Canadian National, to Norway House on Lake Winnipeg, thence to Cache Lake at Mile 321, the nearest landing surface to Limestone River, Mile 350, which is 74 miles from Nelson and as far as steel is laid. From March 23 to April 17 they made 27 return trips to Churchill, transferring material and men with scarcely a mishap. It is thought that their work will be accomplished before the engineer's arrival. A remarkable achievement—Calgary Albertan.

## SON OF JOHN A.

Kingston, Toronto and other places have sent invitations to Sir Hugh John Macdonald, son of the old Conservative chief, and the popular Magistrate, of Winnipeg, to join in their celebration of the diamond jubilee of Confederation. Orillia was the first to take this step, inviting him to attend the proposed jubilee banquet. The committee learned with regret, however, that it is unlikely that Sir Hugh John will be able to come east for the jubilee celebrations. He is suffering from bad circulation in one of his feet, and is facing the probability of having it amputated. Canadians generally will regret to learn of Sir Hugh John's misfortune, which is especially tragic at this juncture, when his fellow countrymen would have delighted to do him honour, both for his own sake (for he is a most lovable man) and for the sake of his distinguished father who did so much to bring about confederation.—Orillia Packet.

## LECTURE HALL FOR EMPLOYEES

The convention hall recently completed by General Motors of Canada, Limited, for the use of its Oshawa employees, is the center of almost nightly activities, ranging from purely social affairs to serious educational and artistic endeavors. At a cost of about \$10,000, the structure, formerly used for a lunch room, was altered and refurnished so that it now serves equally well as a theatre, motion picture house, dance floor or lecture hall. The exterior is attractively finished in brown stain with white trim. No charge is made for the use of the building. Its purpose is to provide an accessible focal point and the inspiration of group spirit for all activities which knit together more closely the factory personnel. Several organizations gather regularly each week at the convention hall. One night is set aside for practice by the factory symphony orchestra of 30 pieces. Another is reserved for the General Motors mixed chorus of 75 voices. A weekly dance is given by the ladies' auxiliary of the General Motors football team. One of the most serious groups using the hall includes 100 factory men who are taking courses with various correspondence schools. They meet each Monday to discuss their mutual problems and topics of general interest. Many of these men are also taking public speaking course conducted at Oshawa once a week by Prof. W. J. Hoskins of the University of Toronto. Incidentally, 30 of the 45 students in the course are factory employees, the remainder belonging to the office staff.

The latest humorous—or supposed—humorous—story about our thrifty Scotch friends comes from London Opinion. Mr. MacDonald tells the clergyman who is to perform the ceremony at his second marriage that he would like the wedding to take place in the chicken yard. "Good gracious, why?" asks the astonished minister. "Then the fowls can pick up the rice," says Mr. MacDonald. "We wasted deal of it last time."

## CANADA'S WHEAT SUPREMACY

The first of what has come to be called the world's championship in wheat was awarded at the New York Land Show in 1911, when Sir Thomas later Lord Shaughnessy of the C.P.R. put up \$1,000 in gold for the best sample of wheat grown on the continent, confident that the money would come back to Canada. Seager Wheeler, justified that confidence, and since then twelve championships have come back to Western Canada in sixteen years.

- 1911—Seager Wheeler, Rosheim, Sask.
- 1914—Seager Wheeler.
- 1915—Seager Wheeler.
- 1916—Seager Wheeler.
- 1917—Samuel Larcombe, Birtle, Man.
- 1918—Seager Wheeler.
- 1919—F. C. Mitchell, Dahinda, Sask.
- 1920—F. C. Mitchell.
- 1922—R. O. Wyler, Luseland, Sask.
- 1923—H. G. L. Strange, Fenn, Alta.
- 1924—F. C. Mitchell.
- 1926—Herman Trell, Wembley, Alta.

## CANADA'S POPULATION

Canada's population is estimated by the bureau of statistics at 9,389,300. This is 600,817 more than the actual census population taken on June 1, 1921. The present estimate is of the population as at June 1 last. For the different provinces, the present estimate compares with the census of 1921:

Province	Estimate	1921 Census
P. E. I.	87,000	88,615
Nova Scotia	540,000	523,837
New Brunswick	407,200	387,876
Quebec	2,561,800	2,361,199
Ontario	3,145,600	2,933,662
Manitoba	639,000	610,118
Saskatchewan	821,000	757,510
Alberta	607,000	588,454
British Columbia	568,400	524,582
Yukon	3,450	4,157
N. W. T.	8,850	7,988
Totals	9,389,300	8,788,483

The figures for the prairie provinces are actual census figures. The 1926 figures for the other provinces are estimates.

The sugar beet crop this year will exceed that of 1926 by 1,000 acres or more, says T. George Wood, District Manager of the Canadian Sugar Factories, Limited, back from a business trip to Calgary and Edmonton. The acreage last year was 6,500. The sugar attracted a good deal of attention at the recent "Made-in-Alberta" exhibition in Calgary.

He had choked her; he had killed her. There could be no doubt about it. He listened to her dying gasp; she was still and cold—cold as the hands of death. Yet, in his fury, he was not convinced. He stepped on her—stepped on her again, with his big, heavy foot. A faint gasp—was she groaning? No, she was still dead. "Damn that engine," he muttered.

## Quality that Cannot be Duplicated at Chevrolet Price

POWER that laughs at high hills and rough roads! Smoothness that thrills you with delight! Speed and acceleration that meet your every demand! Long, resilient springs that cushion every shock! Beauty that makes you proud to be seen driving such a car! A rightness about every little detail that you would expect only in much higher-priced cars!

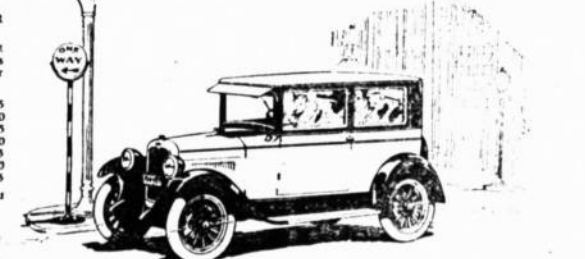

All these things Chevrolet gives you . . .

and only Chevrolet can give them at Chevrolet price. The Most Beautiful Chevrolet in Chevrolet History is now selling at new and lower prices than the lowest for which Chevrolet has ever been sold in Canada.

## BERRYWATER NEWS

A meeting of the local U.F.W.A. was held on Wednesday, May 11th, Mrs. H. Douglass being the hostess. Twenty ladies were present, Mrs. N. S. Campbell presiding. The meeting opened with song "Equal Rights for All." The usual business items and reading of correspondence followed. After various reports had been given and discussed, the program opened by an interesting reading, given by Mrs. H. Douglass. Miss Willa Carr read a short essay on "Food" and Miss Della Carr recited "The Chinese Boy" in costume, very nicely. Community singing was the next item and the roll call was answered by each one present stating her "Likes and dislikes" in household work. At the close of the meeting the hostess served a dainty lunch. The next meeting is to be held at the home of Mrs. N. S. Campbell on May 25, when it is hoped that Miss Larson, the municipal nurse, will give a talk on Anti-toxin, etc. The roll call to be answered with proverbs, new and old.

## BRANT NEWS

Mr. T. Johns was a Calgary visitor on Thursday.

Mr. Harold Buck of Vulcan was a Brant visitor on Wednesday.

Mrs. B. M. Kelley is in Calgary at present visiting with relatives.

A meeting of the Ladies Aid was held at the home of Mrs. Harry Green on Thursday.

Mrs. J. R. McLeod left on Wednesday for Calgary where she will visit with friends.

Mrs. Frank Leach returned home last week from an extended trip to Port Huron, Mich.

The Women's Institute held their meeting at the home of Mrs. F. S. Heckle on Thursday.

Mrs. Wallace Powers of Edmonton is visiting with her parents, Mr. and Mrs. Wm. Auld at present.

Mr. Oscar Blaine, returned home from Barons on Monday after attending the funeral of his father.

Mrs. O'Connell and daughter Mary, left on Tuesday for Weyburn, Sask., where they will visit with relatives.

Mr. Donald Shultz, who has been attending University at Edmonton, returned to his home a few days ago.

Mr. and Mrs. P. Bourque returned to Brant last week and are visiting with friends. They intend making their home at Ensign, Mr. Bourque having taken over Norman Young's store.

The debate which took place at the P.T.A. meeting on Tuesday evening attracted a considerable audience and was enjoyed by all. The subject was one of interest to all parents and teachers. "Resolved that school does more toward forming the child's character than the home." Interesting arguments were put up by both sides, but the affirmative driving home their points more forcefully and convincingly won the debate. Three teachers formed the affirmative side, J. H. Marsh, W. Phillips and L. Ferguson, while three parents upheld the negative side, J. H. Rhodes, Mrs. J. H. Green and Mrs. E. Pearson. The judges were Father Bowlen, Rev. R. T. Harden and Mrs. D. A. Burwash. At the conclusion of the debate, Father Bowlen offered some valuable criticisms. He also congratulated the debaters on their enterprise and hoped to be invited to attend future debates. Business transacted at this meeting included plans for the Empire Day celebration at the school and arrangements for a meeting of surrounding school boards to discuss a school clinic.

The Mother and Daughter banquet under the auspices of the C.G.I.T. was held at the Brant community hall, on Saturday, May 7. The program was proposed to the King, by Ruth Holden, responded to by singing God Save the King, to the G.S.E.T. by Dorothy John responded to by Mr. R. T. Harden; to the Sunday School by Lois Holden responded to by Mr. J. Kelley; to the C.G.I.T. by Bernice Prater; to the Mothers by Annie MacNeil, responded to by Mrs. C. A. Knight. Ruth Holden, president of the club, ably fulfilled the position of toast mistress. The remainder of the evening proved a rare treat in having Miss G. Bateman of Lethbridge to speak on her experiences as an exchanged teacher in London, England. She expressed the hope that many of the girls present would avail themselves of the opportunity to become teachers and fit themselves for application on the exchange. The evening closed with a hearty song which was greatly enjoyed by all present.

## BLACKIE NEWS

"Pop" Ward received the appointment of Field Supervisor and Weed Inspector in the Red Deer district and left for that place to assume his new duties.

O. Olsen, chief grader man of the M.D. of Dinton, was removed hurriedly to the High River hospital on Thursday last where an operation for appendicitis was found necessary.

W. S. McWilliams shipped a splendid carload of horses from Brant on Friday last to Quebec. He shipped in all about 120 head of horses from Alberta to the East in the last two months.

J. A. McDonald moved into his new store on Monday and Tuesday. The increased room, the fine show windows, fittings and counters with the well arranged stock made and imposing and attractive appearance.

A surprise party was tendered Mr. and Mrs. Don Leydon this week when numerous friends gathered at the Auditorium and presented the young married couple a davenport. After the presentation an evening of pleasure was enjoyed by all present.

The youth sealed himself in the dentist's chair. He wore a wonderful striped shirt and a more wonderful checked suit, and had the vacant stare that goes with both. The dentist looked at his assistant. "I am afraid to give him gas," he said. "Why?" asked the assistant. "Well," said the dentist, "how can I tell when he's unconscious?"

## ITEMS OF INTEREST

Alberta Wheat Pool local elevators have handled a total of over five and a quarter million bushels of wheat from the 1926 crop.

Parents should teach their children not to play on the pavements. Every day some child escapes only by the vigilance of the driver.

The pool has forty-two local elevators in operation at the present time. One hundred additional elevators will be built, or acquired during the spring and summer.

The Simcoe Reformer says that for a man to make money at hard work depends on whether he turns up his sleeves or his nose at it.

St. Thomas Times-Journal suggests a string of bonfires throughout the country to celebrate Canada's Diamond Jubilee on July 1st.

There's nothing on earth that gives you more trouble and less value for your trouble, than a personal grudge. If you have one, don't feed it; starve it.

The average handling of the Pool elevators to date is 124,789 bushels per elevator. Some of the elevators were not opened until late in the fall of 1926. On the whole the record of the Pool group of "houses" has been satisfactory.

At a cost expected to run to the neighborhood of \$120,000 ultimately, so has just been broken for the erection of four large greenhouses in Lethbridge by the Terrill Floral Co. The company intends adding greenhouses from time to time as business warrants.

Arrangements are being made by the Provincial Government for the selection by the Hon. H. Greenshield of 75 British boys for training in the Government agricultural schools. The results of previous Government efforts along these lines have been highly satisfactory—151 boys have so far been handled under this system.

The consumption of Canadian lamb is increasing steadily as a result of the better care farmers are taking in producing this article, according to Col. Robert McEwen, President of the Canadian Co-operative Wool Growers. He contended that the popularity of "spring lamb" could only be lessened by the careless use made of the term by restaurants.

"The spirit of optimism which characterizes the west, is the ascendant, and personally I have found the people of the prairies and at the coast very cheerful and hopeful," said Grant Hall, vice-president of the Canadian Pacific Railway, on his inspection tour of Western Canada. "The type of settlers coming into Western Canada is splendid, men and women ready to do their bit in the building up of the country."

A bulletin issued by the poultry department, of an experimental farm, advises the changing of breeding grounds for chicks. "It has long been known," the bulletin says, "that chicks placed on new land, that is, land over which poultry had not previously been running, would out-grow those raised on previously used land."

The most convincing evidence as to the value of reforestation comes from Hettlerburg, Germany, where the municipal authorities have just announced that all property and business taxes collected for the past three years are to be remitted as the municipality owns forests, the products from which are sufficient to cover these levies.

The business men of Okotoks have organized into a joint stock company under the name of the Okotoks Arena Ltd., and will build a rink 205x80 in size making it one of the best ice surfaces in this part of the province. The total cost will be about \$8000 and a sale of stock will be commenced to finance the project.

Sir Frederick Stupart, director of the Toronto bureau of the Dominion meteorological offices, expressed the definite opinion that if an excess of water had not been taken from the Great Lakes system through the Chicago drainage canal, the raging Mississippi floods that have taken such a toll of life and property would have been very much less severe.

"It used to take two sheep to clothe one woman," says a humorous British observer. "Now, I understand, it takes only one silkwool." But the cotton and woolen industries are not the only ones that are in difficulties. Robbed hair has put most of the African ostrich farms out of business, for ostrich plumes do not go with the close-fitting hats that the bobbed and shingled hosts affect.

Strome Pool elevator heads the list with total handling of 266,979 bushels. C. K. Kreuger is manager of this elevator. Ponoka Pool elevator, C. C. Sholtens, manager, handled 218,193 bushels, ranking second in the list. Coaldale handled 216,500 bushels, N. Nelson being manager of that elevator, which ranked third. Killam is fourth with 214,301 bushels, G. A. Murray, manager. Hussar, with 209,836 bushels handled, is fifth, R. C. Armstrong being the manager. Other Pool elevators with good handlings are: High River 187,537 bushels; Woodhouse 176,025; Daysland 175,193; Dalmead 166,262; Ensign 164,496; Castor 150,053.

## ITEMS OF INTEREST

A horse named Whiskey, won the Kentucky Derby and the Lethbridge Herald says he didn't even stagger on the home stretch.

The Calgary Power Company is now dealing with Maceled on a proposal to buy the town power house and extend the company's high power line to the town.

The Alberta government's Calgary office was opened Wednesday of last week by Hon. O. L. McPherson. He said that visits to Calgary would be made each week by some member of the cabinet in future.

The wide, unbroken spaces of the old Cameron ranch are fast becoming a thing of the past. Breaking plows are turning up the sod in every direction, and the land is dotted with new homes.

Duchess of Westminster is not only one of England's most beautiful matrons, but also one of that country's most accomplished horsewomen. She is the daughter of Col. Cornwallis West, while her husband is reputed to be one of Britain's three richest men.

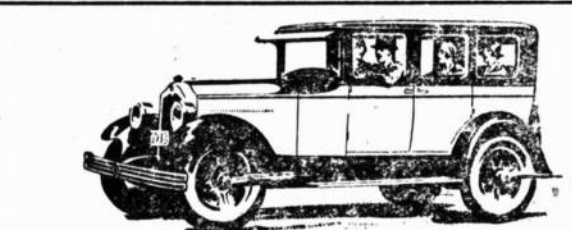

Motorcycle police patrol of Alberta main highways will be started shortly. A force of several men will endeavor to educate motorists as to the provisions of the Motor Vehicle Act about which most people have a very hazy idea.

Material is being hauled from the Skov Lumber Yards to the loading station south of Cayley where the Alberta Wheat Pool is building an elevator. Messrs. Voss Bros. have the contract for this elevator as well as an elevator at Cayley.

A decree of divorce nisi, to become absolute in three months, was granted to Herbert Edge Elves, of Lomond, Alberta, against his wife, Jessie Elves, of Calgary. The usual statutory grounds were proven, and the custody of the adopted child of the parties was given to the plaintiff husband.

The "Model Home" raffled by the Shriner of Calgary was won by Mrs. Dimpie of Calgary. The fortunate lady had purchased a ticket and immediately proceeded to forget that she had made such an investment. Imagine her surprise when she was notified that she had won the title to this magnificent home.

Looking bronzed and healthy, the Prince of Wales returned to London Thursday, from his trip to France and Spain which kept him away from home about a month. He was accompanied on his return by Prince George. They were greeted at Waterloo station by the Spanish ambassador to whom the British heir apparent remarked that he had enjoyed a very pleasant time in Spain.

To those who regard a car as an Investment

McLAUGHLIN-BUICK enjoys the largest measure of public confidence and popular acceptance ever accorded any fine car because McLaughlin-Buick represents the safest investment, the firmest security and the highest return.

The buyer of a McLaughlin-Buick consciously invests his money in more miles of transportation, in greater comfort and luxury, in more satisfying performance, in absolute dependability.

Such phenomenal advances as the McLaughlin-Buick Engine, Vibrationless beyond belief—Torque Tube Drive—Mechanical Four-Wheel Brakes—Sealed Chassis—Vacuum-cleaned Crankcase—are evidences of the firm determination to keep McLaughlin-Buick always the standard by which automobile investment values are judged.

Those who regard a car from an investment standpoint should first consider McLaughlin-Buick, not merely its quality and beauty today, but its lasting dividends of undiminished satisfaction.
